

Nama : satya yuda purnama

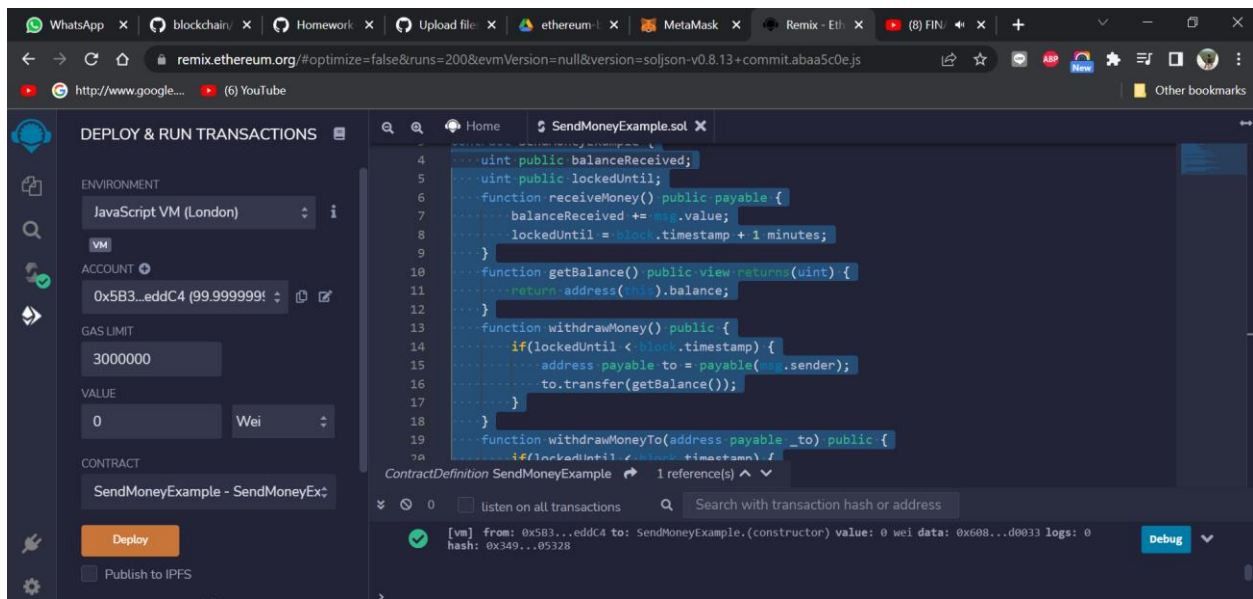

NIM : 1193184137

Kelas : TK-42-PIL

LAB 1 : Deposit/Withdraw Ether

-Membuat smart contract :Send money example .sol

```
// SPDX-License-Identifier: GPL-3.0
pragma solidity ^0.8.10;
contract SendMoneyExample {
    uint public balanceReceived;
    uint public lockedUntil;
    function receiveMoney() public payable {
        balanceReceived += msg.value;
        lockedUntil = block.timestamp + 1 minutes;
    }
    function getBalance() public view returns(uint) {
        return address(this).balance;
    }
    function withdrawMoney() public {
        if(lockedUntil < block.timestamp) {
            address payable to = payable(msg.sender);
            to.transfer(getBalance());
        }
    }
    function withdrawMoneyTo(address payable _to) public {
        if(lockedUntil < block.timestamp) {
            _to.transfer(getBalance());
        }
    }
}
```

-Mendeploy smart contract. Dengan begitu smart contract telah berhasil dibuat
